

UC AND COLLABORATION in the CLOUD

benefits for LOCAL GOVERNMENT

1 COLLABORATIVE

Improve internal collaboration and the services you provide to local residents

- Enable employees to collaborate from anywhere on any device, reducing the environmental impact of travel
- Make your employees more productive by giving every team member access to the same information, at any time, with the ability to facilitate seamless communications
- Take advantage of greater collaboration for first-time resolution of local residents' issues
- Retain employees by enabling them to work flexibly

2 COST-EFFECTIVE

Do more with less, future-proof your communications and allow your employees to work from any location

- Mitigate end-of-life legacy products and services and eliminate maintenance and support contracts (or work existing legacy assets for longer with our overlay solution)
- Remove the need for upfront capital investment and introduce flexible licencing options
- Better utilise your IT resources with simplified IT management
- Manage and understand your costs better by allocating spend by business unit or department
- Optimise your use of office space and make workspaces more functional, or repurpose it for use by local residents and community groups

3 FLEXIBLE

Access to services, features and functionality as and when you need them

- Ability to quickly scale up to 100,000 users based on unforeseen demand that might result from a local crisis or incident
- Easily add or delete new users and add new features and functionalities as required
- Integrate multiple applications

4 SECURE

No single point of failure, a PSN-accredited secure solution

- Built-in end-to-end security and PSN compliance within the cloud solution means there is no need to retrospectively apply security controls as a separate task
- Compliance assurance as the solution is designed, built and implemented around CESG Cloud Security Principles
- Reduced data centre infrastructure requirement and your environmental footprint
