

EXTREME MANAGEMENT CENTRE FOR PROFESSIONAL SERVICES

Whether you're in accountancy, law or any other professional services, your clients rely on you for your expertise, whilst you rely on agile, adaptive and secure networking solutions to meet their needs.

Daisy and Extreme Networks can simplify and transform your IT environment with Extreme Management Centre technologies, so you can focus on driving business forward.

1 Increase business efficiency and billable time

By automating administrative processes, enabling your IT team to act with agility and speed using real-time information, you can improve efficiency, productivity, responsiveness and client focus.

✓ **Boost staff productivity with high-speed connectivity across your entire estate**

✓ **Manage your network efficiently from a single interface that integrates automation, visibility and control**

✓ **Reduce administrative tasks and troubleshooting time to maximise billable hours**

✓ **Mitigate issues quickly and make real-time decisions based on actionable insights**

Make life easier for your IT staff

2

Free up IT staff's time so they can focus on innovative and revenue generating activities without worrying about the health of your network. In turn, this can help attract and retain top talent and improve job satisfaction.

✓ **Give staff the freedom to work anywhere, whilst always being connected**

✓ **Rapidly on-board BYOD users and Internet-connected devices**

✓ **Deliver a high-quality, trouble-free user experience with one easy-to-use dashboard**

✓ **Enable staff to focus on value-added work with the automation of routine tasks and customisable dashboards**

3 Transform client interaction anywhere, any time, on any device

Deliver a more efficient service to your clients by giving them immediate 'anywhere' access to the people and information they demand.

✓ **Understand your clients' needs with real-time access to information**

✓ **Respond to clients quickly and provide faster resolution times**

✓ **Make real-time decisions on policies, devices, applications and people**

✓ **Enable your clients to get online simply, swiftly and securely when they visit**

Stay secure and compliant to avoid breaches and penalties

4

Protect your network, your data, your client's data and your reputation, while keeping pace with the demands of new regulation.

✓ **Automatically detect, block and remediate threats on your network**

✓ **Reduce the risk of implementing new technologies such as BYOD and IoT with fully-automated policy setting and testing**

✓ **Stay compliant with industry standards through automated configuration and compliance monitoring**

5 Keep your network running smoothly with one managed service

Relieve your IT team from ongoing network operational demands, and let Daisy take care of your network through managed services.

✓ **A simple, single point of contact for the support of your network**

✓ **End-to-end services across your entire infrastructure – whether on a wired or wireless network**

✓ **Enterprise-class support**
