WHAT IS ACRONIS BY DAISY?

Current factors driving improved, integrated security solutions:

- Business changes such as remote working
- The proliferation of endpoints
- Digital transformation projects
- Exponential data growth
- Technological advancements
- 970 Million pieces of malware are circulating the internet right now (AV-Test Institute)
- 350,000 new malicious programs are detected every day (AV-Test Institute)
- 80% of breaches are new or unknown "zero-day attacks" (Ponemon Institute)
- Traditional antiviruses miss 57% of attacks (Ponemon Institute)

Backup and Recovery

Fast and reliable recovery of your apps, systems and data with forensics capability

Anti-Malware and Antivirus

Next generation, full stack AI/ML-based protection against malware incl. ransomware, URL filtering and backups scanning

One solution integrates backup, disaster recovery, AI-based protection against malware and ransomware, remote desktop, and security tools in a single agent

Security and Management

Endpoint management toolkit: remote desktop, vulnerability assessment and patching save IT resources

Traditional tools are no longer adequate

Traditional AVs do not protect data

- No data recovery
- Advanced and zero-day attacks
- Known vulnerabilities

Multiple solutions add complexity & cost

- Conflicting agents
- Backend and staff costs
- No single pane of glass

Traditional backups are not secure

- Vulnerable to attacks breaches and modifications
- Infected, non-restorable machines
- No self-protection, no investigations support

Not Protected | **Expensive** | **Not Secured**

Acronis by Daisy protects all of this...

Microsoft 365
Google Workspace

With Acronis by Daisy:

Likelihood of a breach

Likelihood of mitigating a breach

ACRONIS BY DAISY SUMMARY

Your swiss army knife for cyber protection, with backup, disaster recovery, antivirus protection in one – great protection against ransomware and other cyber nasties.
