

# 10 REASONS TO ADOPT DAISY DIRECT2TEAMS

Adopting collaboration tools which support remote workers and flexible working means your teams can remain agile and responsive to changing needs. Daisy Direct2Teams allows your Microsoft Teams-enabled staff to make and receive external calls from within a single workspace.

And, we can work with you to replace your existing PBX with an integrated business phone system delivered from the Microsoft cloud.

1

## Supports smart working

Use Teams to chat, message, share files and make calls from a single workspace

## Enable remote working staff

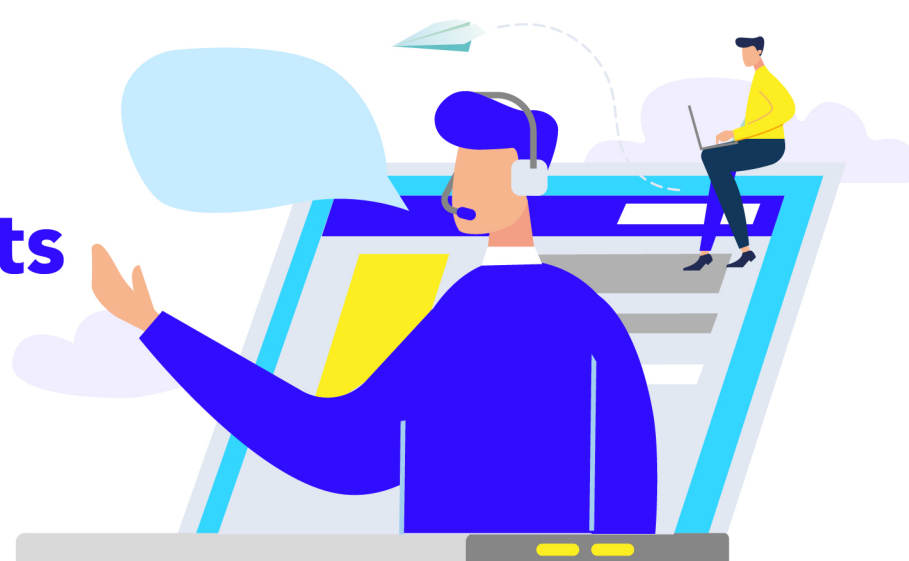

With Teams Rooms you can participate in online meetings face-to-face, in which colleagues can create and collaborate from any location, on any device

2

## Leverage your existing investments

Use existing telephony to power Microsoft Teams calling

## Enterprise feature-rich calling

Retain the calling features you rely on today with a hybrid service

4

## Retain existing telephone numbers and tariff

No need to subscribe to a Microsoft Calling Plan

## Supports the move to a managed cloud service

For customers with ageing on-premise PBX

6

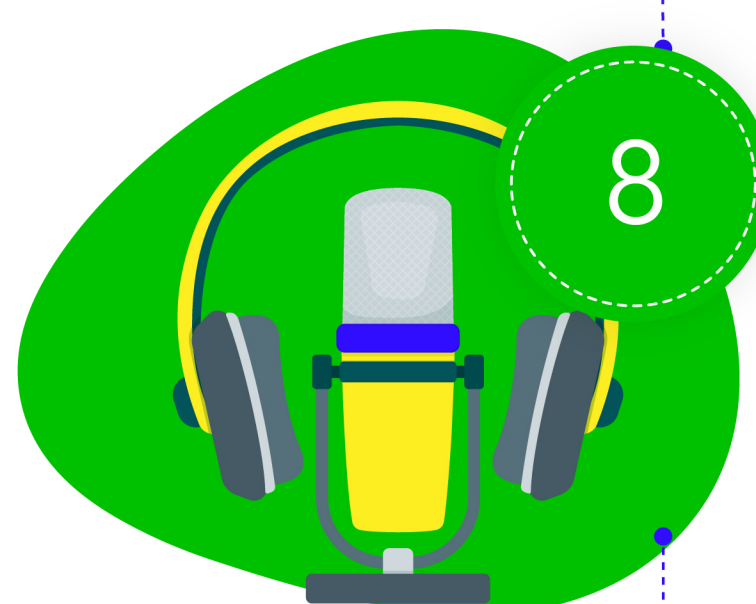

## Improve business continuity plans

Extend your business telephony to your remote office with contact centre capabilities providing routing, queuing, web chats, SMS, email and more

## Compliant call recording

GDPR and MIFID 2 compliant call recording can also be added, giving you full control over what is or isn't recorded

8

## Avoid costly per-user 'use or lose' calling plans

Take a subscription-based service which flexes on demand

## Enterprise-grade security

Secure calling for mobile teams, no matter where your staff are based

10

Daisy has been specialising in voice, SIP and Unified Communications for more than 20 years, we're also a Microsoft gold certified partner and CSP, with expertise in deploying Microsoft services, including Microsoft 365 and Teams. Who better to help you to unite your voice and collaboration platforms and leave behind your legacy systems and contracts.
