# HEALTH AND SOCIAL CARE NETWORK TO BETTER SERVE PATIENTS

## What solutions can Daisy provide?

The Health and Social Care Network (HSCN) is a new data network for Health and social care organisations. Having replaced N3, HSCN provides an underlying arrangement of networks that help integrate and transform the health and social care services by enabling them to access and share information more reliably, flexibly, efficiently and securely.

Health and care providers are able to obtain network connectivity from multiple suppliers in this competitive market place and in collaboration with other health and social care organisations. Daisy is one of those suppliers. The market place has extended to the private sector, and to services such as opticians, pharmacies, and other public sector services such as ambulances, the police and education.

## Daisy can help with your migration plan to HSCN

Daisy is now Stage 2 compliant and has joined the new HSCN CCS Dynamic Purchasing System, also known as "RM3825" which is unique to the HSCN network. Being compliant with both RM3825 and RM1045, Daisy has cemented its position as a trusted provider to the NHS allowing them to partner with NHS Trusts, Clinical Commissioning Groups, GP surgeries and a wide range of other health sector businesses and organisations.

Working with over 800 GP surgeries and 90 hospitals throughout the UK, our experience of the health and social care environment and engagement with NHS Digital, local government and a broad spectrum of end users translates into a secure and efficient service provider that can be trusted to help you.

Daisy can deliver you through RM3825 or through Direct Award

## HEALTH AND SOCIAL CARE NETWORK

### Why choose Daisy to help you with HSCN?

- Nationwide independent aggregator of services
- 24/7/365 technical support
- Compliant with NHS requirements
- Trusted provider to the NHS
- Strong history in health sector
- Other complementary service offerings such as telephony, WiFi, security, networking and mobility
- End-to-end capability
- UK-wide network of field engineers

### What challenges does HSCN resolve?

N3 connections can no longer be ordered. HSCN has replaced legacy N3 connectivity and empowers new services such as UC&C, Mobile and Network Connectivity and further digitisation of clinical solutions. With HSCN Daisy is now able to:

- Reliably and securely send and receive data between Health and Social Care Organisations
- Offer cheaper connectivity rates compared to previous N3 services
- Follow simpler network Information Governance requirements
- Ensure staff across Health and Social Care networks are able to work together
- Effortlessly follow network standardisations
- Provide simpler access to NHS Digital's national applications, making it easier to confirm NHS numbers, share care plans and access Summary Care Records

### HSCN – not just for the NHS

HSCN goes beyond the NHS. It includes both Public and Private sector Health providers and the Social Care market. Many service providers are working together to connect to HSCN. These include:

- Any Clinical Commissioning Group (CCG), doctors' surgery, NHS trust, hospital, secondary care facility, care facility or care homes providers
- Dentists, opticians or pharmacies
- Local councils, police, fire services or transport providers
- Any new facilities being built.
