

## MANAGE YOUR NETWORKS EFFORTLESSLY:

# EIGHT BENEFITS OF EXTREMECLOUD™ IQ

Created by Extreme Networks.  
Delivered by Daisy.

Control your entire network edge with full, end-to-end visibility of all wired and wireless access points...

### What you get:

A single, dynamic, cloud-based interface to monitor and continually optimise your whole network

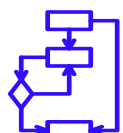

An unprecedented blend of power, flexibility and security, built on a 4th generation platform

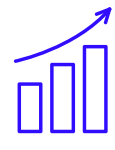

## THE BENEFITS:

### FLEXIBILITY

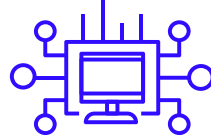

Transforms the most complex network architecture into a dynamic whole

Works for any business, from multi-branch to single-office organisations

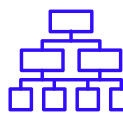

### VISIBILITY AND CONTROL

See and manage all connected devices, wired and wireless access points, routers etc., all through a single interface

### AGILITY

Connects people, apps and information in the swiftest and most sophisticated way

Continuous innovation and delivery at scale

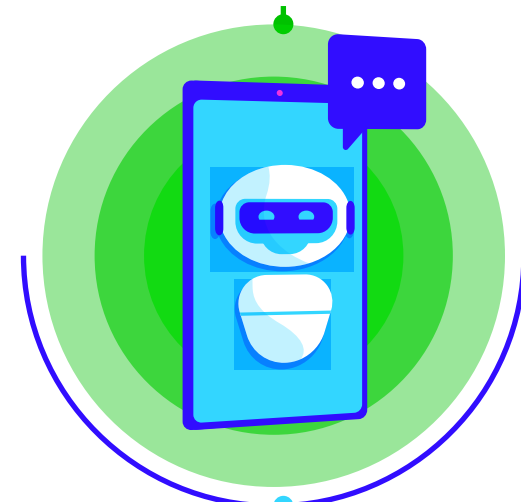

### HYPER-EFFICIENCY

Streamlines all aspects of your network from deployment to maintenance

Helps IT focus on what's really important by eliminating menial and operational tasks

### MACHINE LEARNING (ML) AND ARTIFICIAL INTELLIGENCE (AI)

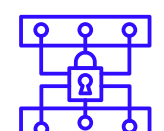

Built-in ML and AI to optimise apps, infrastructure and roaming, while minimising downtime

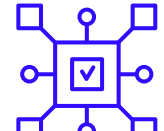

Real-time ability to monitor and prioritise apps as usage fluctuates, thus optimising bandwidth

### NETWORK HEALTH

A complete performance and security picture for every user and device linked to your network

Real-time and historical view of client and device health, with built-in remediation tools

### SECURITY

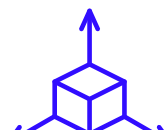

The only cloud-based network management tool with ISO 27001 certification

Protects data across the platform, proven in the most risk-sensitive environments

### CLOUD CHOICE

Three cloud deployment options: public, private or on-premise

Enjoy the same capabilities and features, regardless of your chosen option

### READY TO GROW, CREATE AND OUTPERFORM YOUR MARKET?

As an Extreme Networks Ultimate Master Partner, Daisy can help you tailor ExtremeCloud™ IQ to your particular requirements and get more from your IT budget. With more than 25 years' experience in providing managed services, Daisy can provide end-to-end project delivery with ongoing support thereafter. You can choose to enlist help from experts who can get involved as little or as much as is necessary, ultimately helping you get the most out of your investment.
