

IT RECYCLING
& DATA
DESTRUCTION

SECURE AND ENVIRONMENTALLY-FRIENDLY IT EQUIPMENT DISPOSAL

It's never been more important to reduce your carbon footprint and be accountable for your environmental impact. At the same time, cyber criminals have never been more active and it is imperative that your retired IT equipment has had all data removed to the highest security standard.

Did you know?

IT equipment contains materials that can contribute significantly to global warming, pollution and health issues if not disposed of correctly.

Did you know?

By failing to protect your confidential data, you could receive fines of up to 4% of global annual revenues.

Overview

A unique approach to IT recycling and data destruction

We are able to provide you with a complete IT recycling and data erasure service. Our chosen partner uses a refined process of dismantling each item that reduces cross contamination and ensures every element of a piece of IT equipment is recycled correctly.

The methods used are compliant with current **WEEE (Waste Electrical and Electronic Equipment) recycling legislation** and we provide a complete audit trail throughout the process. This includes full end-of-life audit reports and certificates of destruction to ensure you can track the journey of your old equipment, to a zero-landfill end of life.

If you also need to erase data from equipment before it is recycled, our partner is **CAS-S certified**, which means that we are able to destroy data to Government secret level.

IT RECYCLING & DATA DESTRUCTION

What does Daisy IT Recycling & Data Destruction deliver?

Our service delivers peace of mind that data deletion is safe and responsible across all your devices – from hard drives and smartphones to media devices and tapes. Not only will we effectively erase your data, we'll also provide you with accreditation certificates for your records.

Our processes and procedures guarantee that all your data is effectively removed in a way that best suits your business. We offer a service tailored to your individual needs, either on your site or at our premises, which could include:

IT Recycling services:

- Printed circuit board recovery
- Precious metal recovery
- Cable recovery
- Cable granulation
- Environmental compliance
- Storage and inventory

Data Destruction Services:

- Data erasure
- Data destruction
- Data shredding

IT Recycling:

Take advantage of our IT recycling service and unlock these benefits.

-  Cost savings
-  Space savings
-  Customer and employee satisfaction
-  Compliance

- ✓ Improve your reputation by becoming clean and green
- ✓ Achieve full compliance with criteria set out in the WEEE Compliance scheme, and other legislation
- ✓ Save space, reducing storage costs and the safety issues that surround redundant data
- ✓ Boost employee morale and customer loyalty by demonstrating that you're environmentally friendly
- ✓ 0% of our IT disposals go to landfill

Data Destruction:

Our options extend to not only hard drives, but media devices, tapes and any other device which can hold or store critical data.

Hard drives

Smart phones

Mobile devices

Tapes

- ✓ Guarantee the safety of your personal data and protect your customers' details
- ✓ Comply with global security and privacy regulations
- ✓ Prepare your outdated equipment for the next stage of disposal
- ✓ Avoid legal fines of up to 4% of your global annual revenues
